

Safe Agriculture, Since 1998!

PRODUCT INFORMATION

CROMIN is a salt of phosphorous acid and is an excellent plant nutrient. It is readily absorbed and translocated by the plant system.

COMPOSITION

Salt of phosphorous acid : 40.00%
Emulsifiers & Functional media : 60.00%

FORMULATION: Available in liquid form.

CROPS: All crops.

DOSAGE: 2ml per litre of water. For soil drenching use 5ml per litre of water.

APPLICATION METHOD: Mix the recommended quantity thoroughly in sufficient amount of water & spray evenly on the plant surface.

ADVANTAGES: A unique nutrition supplement based on salt of phosphorus acid to provide nutrition to plants and increases the size of fruits and vegetables as well as build up resistance against several diseases like Damping Off, Koleroga of Arecanut, Wilt & Downy Mildew etc.

SHELF LIFE - 3 years from the date of manufacture.

PACKS AVAILABLE: 100ml, 250ml, 500ml & 1000ml.

Compatibility of our formulations with other growth supplement/agri-inputs: It is best to avoid mixing with sulphur and copper based products as well as micro organism based products. It is always advisable to try a small sample for mixing any two formulations before farm-level application to ensure the physical stability and tolerance by plants.
