

Safe Agriculture, Since 1998!

PRODUCT INFORMATION

JAIVIZYME HUMIC AND FULVIC ACIDS is a premium biostimulant for healthier crops and optimum yield. Humic & Fulvic Acids being extracted from highly bioactive organic substrate inherently contain traces of several important plant growth promoting substances.

COMPOSITION:

Humic acid (min.) : 6.00 (w/v in %)

Fulvic acid (min.) : 1.00 (w/v in %)

FORMULATION: Available in liquid form.

CROPS: All crops.

DOSAGE: 2-3ml per litre of water. For soil drenching use 5ml per litre of water.

APPLICATION METHOD: Mix the recommended quantity thoroughly in sufficient amount of water & spray uniformly on the plant surface.

ADVANTAGES

- ✓ Improves physiological processes like nutrient and water uptake through root development, nutrient utilization efficiency.
- ✓ Increased soil aeration, improved water holding and reduced soil erosion.
- ✓ Improves photosynthesis.
- ✓ Improves crop yield.

SHELF LIFE - 5 years from the date of manufacture.

PACKS AVAILABLE: 100ml, 250ml, 500ml & 1000ml.

Compatibility of our formulations with other growth supplement/agri-inputs: It is best to avoid mixing with sulphur and copper based products as well as micro organism based products. It is always advisable to try a small sample for mixing any two formulations before farm-level application to ensure the physical stability and tolerance by plants.

REGISTRATION STATUS: Application for provisional registration is under process under the category of biostimulant.
