

## PRODUCT CODE

## ORGANIC WEEDICIDE BP13 – LIQUID

HUNT-UP Weedicide is a non-selective, post-emergence weed control mainly for broadleaf weeds. It is formulated to deliver maximum performance and provides fast acting results on a long list of weeds.

<b>Composition</b>	<b>Ingredient</b>	
	Combination of vegetable fatty acids	: 80.00% w/v
	Functional media	: 20.00% v/v
	Total	: 100.00%

**Dosage:** 50-90 ml / ltr of water, depending on foliage.

### **Application**

Mix this product in the recommended proportions and spray thoroughly using battery operated sprayer. The vegetative burn down takes 7 to 10 days. Care must be exercised to avoid contact of spray with foliage of desirable vegetation / plants.

### **Mode of Action**

Made of natural vegetable fatty acids and Functional media, HUNT-UP Weedicide works by burning the waxy cuticle of green vegetation. It will not move through soil to injure nearby plants. It is fast-acting and features a unique mode of action that kills only plant leaves and shuts down photosynthesis, causing the plants to essentially starve to death. Active ingredient penetrates the cell walls of plants, disrupting the cellular functions of the targeted weeds and killing them within hours of application. Also, the active ingredient affects the cuticle, which protects the leaf from evaporation and desiccation, thus solubilizing the lipids and the sprayed foliage wilts and then dies.

### **Directions For Use:**

Mix a 5 – 9 % solution for control of all kind of leafy weeds. Repeat applications may be required on larger weeds and to maintain desirable level of weed control and to control plants emerging from seed and underground parts.

### **User Safety Recommendations:**

Users Should:

- Wash hands thoroughly before eating or drinking
- Remove clothing immediately if the product comes in contact with it and wash it thoroughly.
- If in eyes, hold eye open and rinse slowly and gently with water for long.
- If on skin or clothing, take of contaminated clothing, rinse skin immediately with plenty of water.

- If inhaled, move person to fresh air and seek medical attention.
- If swallowed, get medical attention.

Note to Physician: Contains fatty acids and petroleum distillates.

### **Shelf Life**

5 years from the date of manufacture.

### **Environmental Hazards:**

Do not apply directly to water, areas where surface water is present. Do not contaminate water when disposing of equipment/containers. Percentages of active constituents are subject to change or vary depending upon the storage conditions and exposure to heat or sunlight. In cases of high water hardness, good quality surfactant is advisable for better solubility.
